

Chapter 19 - Chapter2.4

Theory:

This chapter covers the topic of Chapter2.4.

Code Example:

```
a = int(input("Enter a number 1: "))
b = int(input("Enter a number 2: "))
# for avg of two number
c = (a+b)/2
print(f"The avg of given terminals i s: {c}")
# Or
print(" the avg is : ", (a + b )/2)
```
