

## Chapter 14 - Chapter1.1

### Theory:

This chapter covers the topic of Chapter1.1.

### Code Example:

```
print('''  
When some people talk about money  
They speak as if it were a mysterious lover  
Who went out to buy milk and never  
Came back, and it makes me nostalgic  
For the years I lived on coffee and bread,  
Hungry all the time, walking to work on payday  
Like a woman journeying for water  
From a village without a well, then living  
One or two nights like everyone else  
On roast chicken and red wine.  
-Tracy K. Smith  
''')  
# Table of num(any number )  
num = 1  
while num <= 10:  
    print(f"5 x {num} = {5 * num}") # You can replace 5 with any other number  
    num += 1
```
