

Chapter 52 - Try Else

Theory:

This chapter covers the topic of Try Else.

Code Example:

```
try:  
    a = int(input("Enter a number : "))  
    print(a)  
except Exception as e:  
    print("heyy")  
    print(e)  
else:  
    print("i am inside the else ") # if try will runn succesfull - itc come in else OTHERwese  
    it will throw errore "Exception"Except
```
