

Chapter 37 - Tempcoderunnerfile

Theory:

This chapter covers the topic of Tempcoderunnerfile.

Code Example:

```
with open ("table.txt","w")as f:  
    (f.write("table doc \n"))  
    n = int(input("enter a num to print table : "))  
    table = [n*i for i in range(1,11)]  
    with open ("table.txt","a")as f:  
        f.write(str(f" Table of {n} is : {table} \n"))  
    print("done")
```
