

## Chapter 36 - Open Cmd

### Theory:

This chapter covers the topic of Open Cmd.

### Code Example:

```
import os
def open_cmd():
    try:
        os.system("start cmd") # This will open CMD in a new window
        print("CMD should now be open.")
    except Exception as e:
        print(f"Failed to open CMD: {e}")
if __name__ == "__main__":
    open_cmd()
```
